INSTALLATION GUIDE

How to install the CORRE sliding insect screen

The CORRE sliding screen arrives assembled: nothing to join. It goes into the sliding window frame — top first, then the bottom — and is adjusted to glide freely.

> **Safety**
> The insect screen protects against insects and small animals. It is not designed to stop people or objects from falling, nor to resist break-ins: never lean on it and, on a high window, work with a second person.

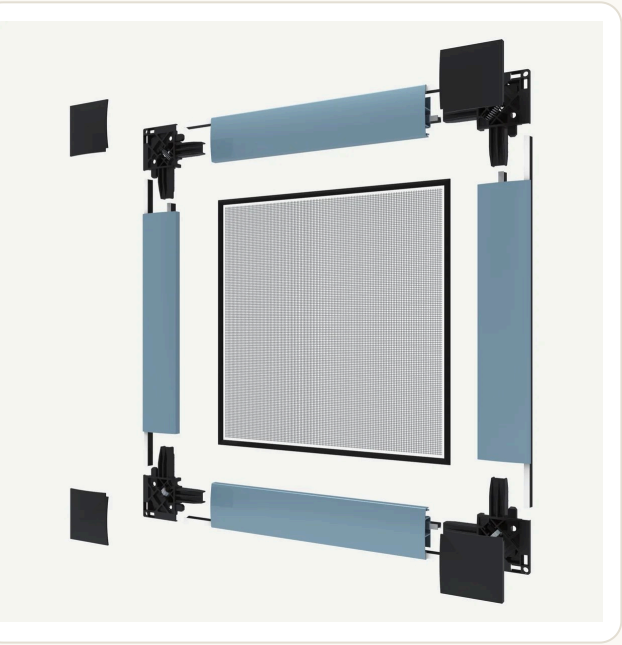

Before you start

Tools

- Drill with bits suited to the wall or frame
- Spirit level (or laser)
- Tape measure and pencil
- Screwdriver

People

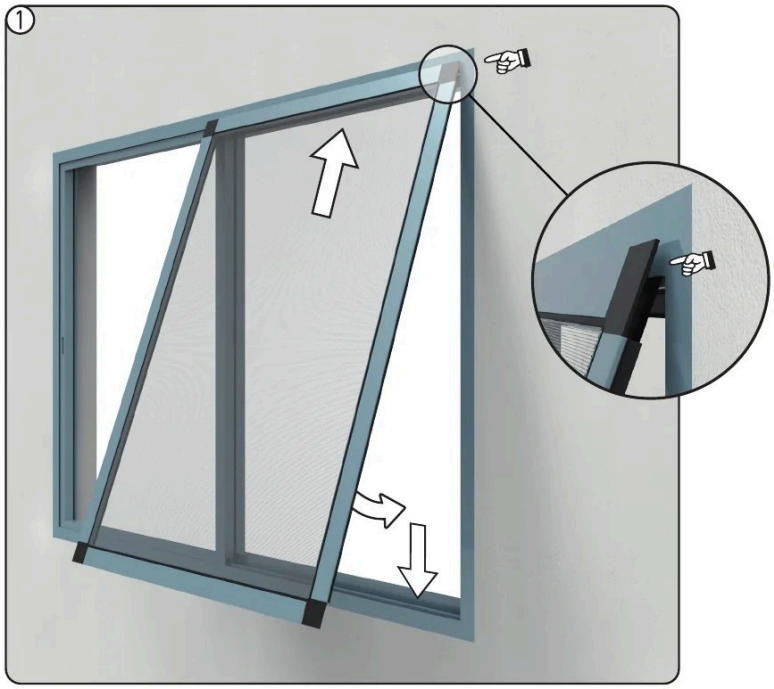

1 person; 2 if the leaf is large

STEP BY STEP

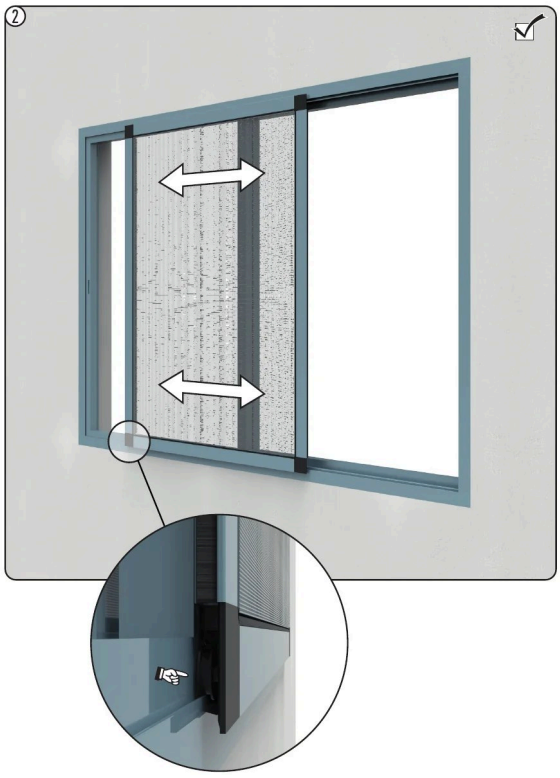

1. Place the screen in the frame

Tilt the screen, push the top into the upper track, then drop the bottom into the lower track. The spring top squares adapt to the frame.

2. Check and adjust

Slide the leaf from end to end: it should roll smoothly. If it rubs or wobbles, adjust the wheels in the bottom squares with a screwdriver until it is plumb.

FINAL CHECKS

Final checks

- The leaf glides without force both ways.
- No visible gap at top or bottom.
- The window opens and closes without touching the screen.

Need a hand?

If something does not fit, do not force it: photograph the problem and send it to us.
