INSTALLATION GUIDE

How to install the FIXE fixed insect screen

The FIXE fixed screen is the simplest: an aluminium frame with mesh, held in the opening by four brackets or in the outer guides of the shutter of a casement window. It comes off and goes back on without tools.

> **Safety**
> The insect screen protects against insects and small animals. It is not designed to stop people or objects from falling, nor to resist break-ins: never lean on it and, on a high window, work with a second person.

Before you start

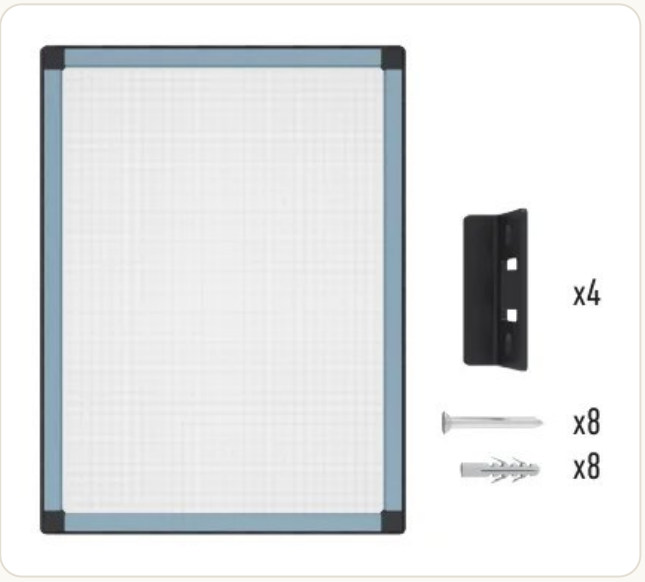

Tools

- Drill with bits suited to the wall or frame
- Spirit level (or laser)
- Tape measure and pencil
- Screwdriver

People

1 person; a few holes and clips

What is in the box

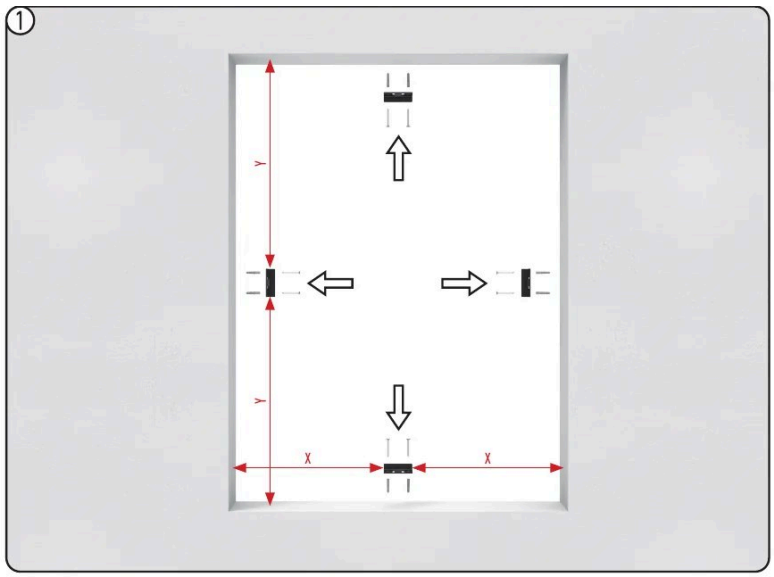

In the box (fixing in the recess): the framed screen, 4 brackets, 8 screws and 8 plugs.

STEP BY STEP

A. Fixing in the recess (brackets)

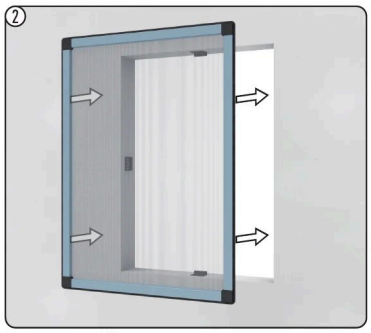

1. Mark and fix the brackets

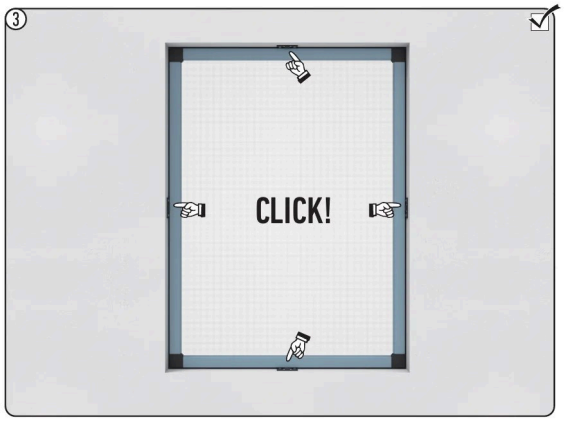

Mark the middle of each of the four sides of the recess at equal distances (x and y) and screw a bracket at each point with 2 screws and plugs.

2. Offer up the frame and press

Offer the frame to the brackets and press on all four sides until each one clicks.

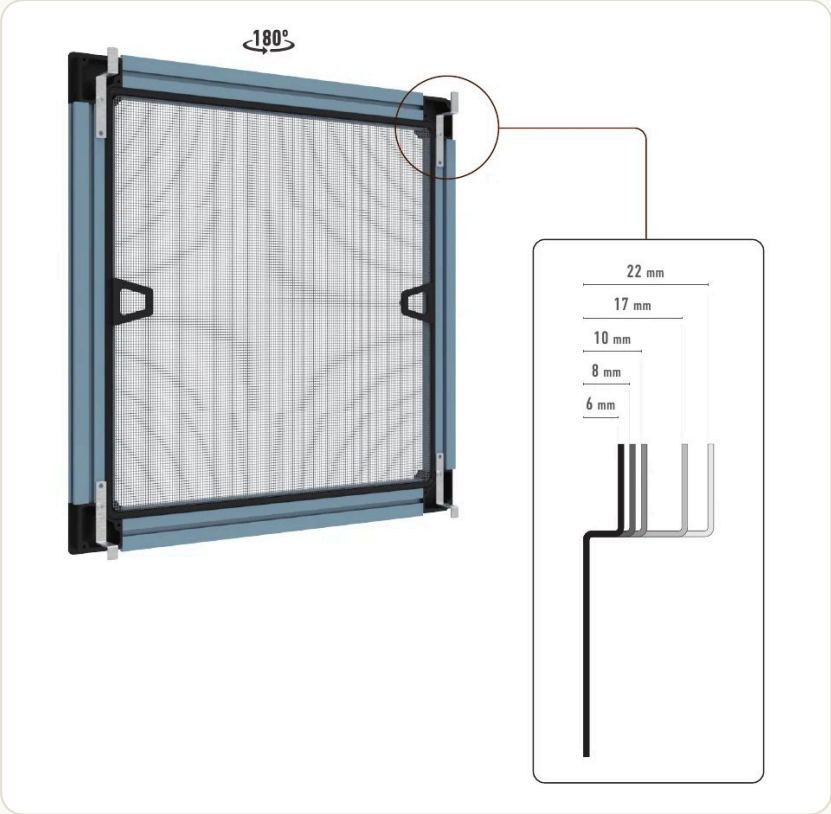

STEP BY STEP

B. Fixing on a casement window (hooks)

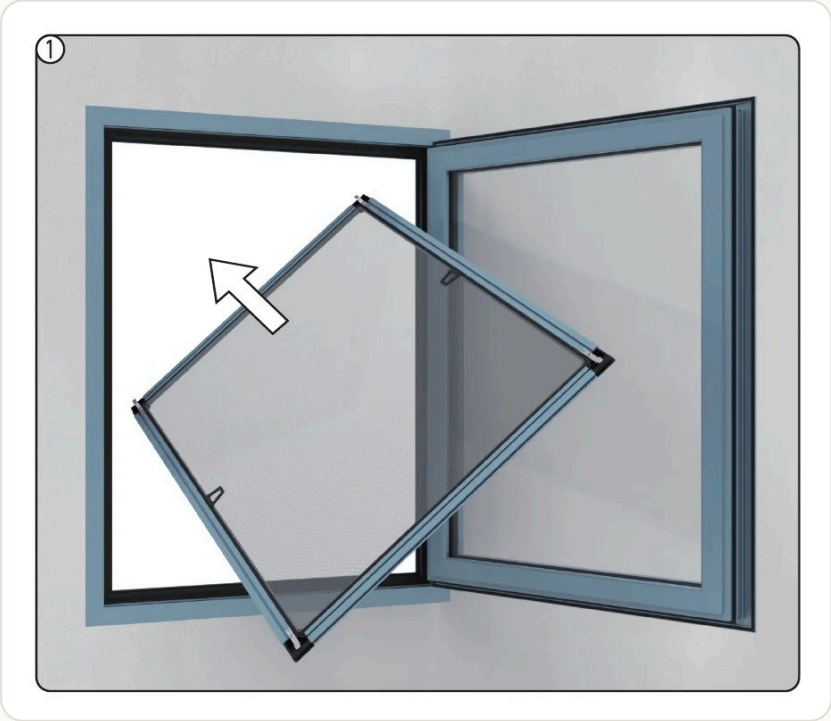

1. Pick the hooks

Hooks come in 6, 8, 10, 17 and 22 mm to suit the depth of the shutter's outer guides. Screw them into the frame squares.

2. Pass the screen through the window

With the window open, pass the screen through tilted.

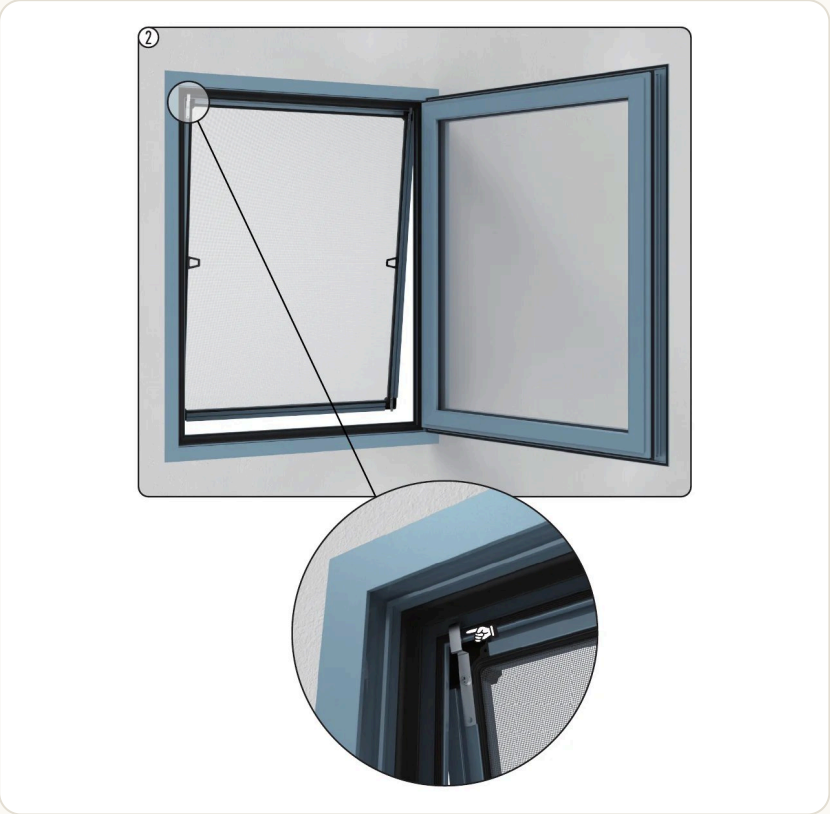

STEP BY STEP

B. Fixing on a casement window (hooks)

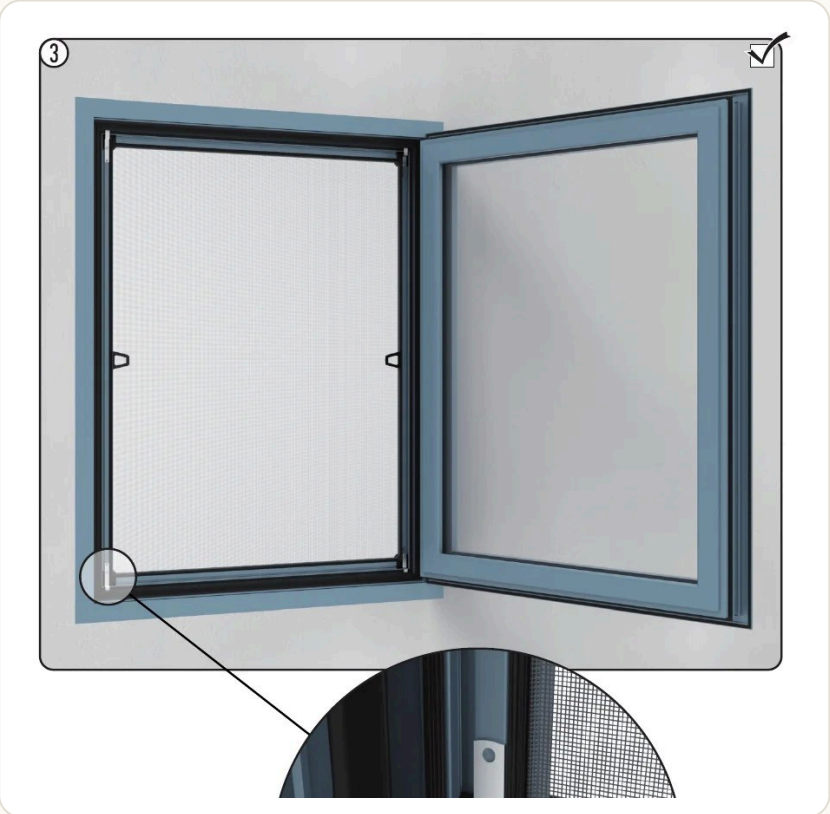

3. Hook the top

Hook the upper hooks into the outer guides.

4. Hook the bottom and check

Do the same at the bottom and check the frame is firm with no gaps.

FINAL CHECKS

Final checks

- The frame is firm on all four sides.
- No gaps between the screen and the opening.
- The screen comes off easily for cleaning.

Need a hand?

If something does not fit, do not force it: photograph the problem and send it to us.
